

Sirs,

Once again big business (The NAB) is trying to quash the competition (XM Satellite Radio), this time with petition 04-160.

If the NAB has the right to dictate what a satellite provider can program, then does the satellite provider not also have the right to dictate what the NAB can offer in its programing?

Of course, neither has this right. Welcome to AMERICA!!!!

XM subscribers pay for the service. Please reject petition 04-160 at the earliest opportunity.

Thanks,

C.K. Ballard
